At the top of each Result Sheet is the wording "If the score is an even number, hits must be an even number. If the score is an odd number, hits must be an odd number." When these do not agree, a point is deducted from the score to bring them into line. Unfortunately, on more than one occasion, I found this to be the case within this month's results. It is in your club's interest to check the scores and hits before sending the sheet to me.
